Legacy 16'

Description:

This 16' Canoe has been refined to the point of perfection. The Legacy has a half or "sister ribbed" White Cedar interior. The planked hull is made from select pieces of British Columbia Red Cedar. Over time the reddish tint will darken considerably creating a remarkable contrast between it, the brass tacks, and the Eastern White Cedar ribs. The Legacy is also available with canvas a skin.

Each hand built hull has a distinct pattern created by the variances in colour found in the planking. The Legacy's hull has the finest lines found in any canoe, being both extremely efficient and maneuverable.

"There is simply nothing that compares"...

This is the constant refrain heard from anyone lucky enough to have paddled the worlds finest 16 footer.
