Prospector 16'6"

Description:

The Prospector 16'6" is a design that has evolved over more than three quarters of a century. The classic silhouette of our Prospector 16'6" bellies its modern high functioning design. A design that Langford continues to hone for optimum performance.

A true tripping hull known for a combination manoeuvrability, efficiency and unparalleled, sea-worthiness. Thanks to the shallow arch design, coupled with a perfect amount of rocker, the hull tracks, glides, and pivots like a dream while the pronounced spray rail keeps the dry even when the water begins to roll and boil. The performance of our Prospector 16'6" makes it the choice for Guides, Rangers, Conservation Officers, Summer Camp Alumni and Paddle Enthusiast of all stripes. The 16'6" is a choice for solo style paddling in front of the dock, slicing across lakes, tandems and loaded, or sliding through streams and rivers.

Whether paddled solo, tandem, or loaded, there are a few canoes that can keep pace with this hull. Anyone looking for the best value for their dollar should test paddle this Langford model.

Specifications
