Ranger 16'

Description:

The Ranger 16' is another of our models that traces its lines from our cedar canoes. Based on our ever popular Cedar Huron models, the Ranger 16' is a serious gear-hauler designed for the Canadian and U.S. Park Services. While paddling the Ranger 16', you'll enjoy all of the refinement and evolution that has gone into this line of hulls over the last 80 years.

Deep and stable, the Ranger 16' is at home on a variety of waterbodies from creeks to big windswept lakes, and the integrated spray rail casts water from the hull, keeping gear and passengers dry. The same lines that make this high-capacity, stable workhorse, the ultimate freighter canoe, also makes it the choice for anglers and hunters alike (especially in cold water). Whether used for a day paddle with the family at the campground or a multi-week backcountry curveying expedition, the Ranger 16' affords exceptional forward movement and maneuverability even under load!

Whether you're shopping for your first canoe or another boat to round out your fleet, you owe it your yourself to test paddle the best.

Expertly crafted in our industry-leading composite facility, this Canadian made canoe is a testament to our dedication to surpassing expectations.

Specifications

LENGTH	16'
DEPTH	14.5"
CAPACITY	1000 lbs
BOW	21"
BEAM	38"
ROCKER	1 1/2"
